Art. 15a B-VG (Austria)
Clean Air Act. (UK)

The stove becomes very hot

During operation, certain surfaces of the stove become very hot and can cause burn injury if touched. Be aware of the strong heat radiated through the hatch glass. Placing flammable material closer than the safe distance indicated may cause a fire. Pyre lighting can cause quick gas ignition with the risk of damage to property and personal injury.

Installation by authorised technician

This manual contains instructions about how the stoves must be assembled and installed. To ensure the function and safety of the stove, we recommend that the installation is carried out by an authorised technician. Contact one of our dealers who can recommend suitable technicians.

Building application

These main instructions may give guidance which would contravene national building regulations. Please refer to supplementary instructions or ask your local authority for advice regarding building regulations. Before installing a stove or erecting a chimney it is necessary for you to make a building application permission to your local authority. The owner of the house is personally responsible for ensuring compliance with the mandatory safety requirements and must have the installation approved by a qualified inspector. Your local chimney sweep must also be informed about the installation as this will affect the routines for regular chimney-sweeping services.

Structural support

Check that the wood joists are strong enough to bear the weight of the stove and chimney. The stove and chimney can usually be placed on a normal wooden joist in a single occupancy house if the total weight does not exceed 400 kg.

Hearth plate

Due to the risk of falling embers, a flammable floor must be protected by a hearth plate. It must extend 300 mm in front of the stove and 100 mm on each side of the stove, or have a 200 mm extension on each side of the opening. The hearth plate can consist of natural stone, concrete, metal plate or glass. A painted metal or glass hearth plate is available as an accessory for these models.

Final inspection of the installation

It is extremely important that the installation is inspected by an authorised chimney sweep before the stove is used. Also read the "Lighting instructions", before lighting for the first time.

Connection to chimney

- The stove must be connected to chimneys dimensioned for a minimum flue gas temperature of 400°C.
- The external diameter of the connection sleeve is 150 mm.
- Normal chimney draw under nominal operation should be between 20-25 Pa close to the connector. The draft is affected both by the length and area of the chimney, and by how well sealed it is. Minimum recommended chimney length is 3.5 m and suitable cross section area is 150-200 cm² (140-160 mm in diameter).
- A flue with sharp bends and horizontal routing reduces the draught in the chimney. Maximum horizontal flue is 1 m, on the condition that the vertical flue length is at least 5 m.
- It must be possible to sweep the full length of the flue and the soot hatches must be easily accessible.
- Carefully check that the chimney is sealed and that there is no leakage around soot hatches and flue connections. See page 31.

Supply of combustion air

When a stove is installed in a room, the demand for air supply to the room increases. Air can be provided indirectly via a vent in the outer wall or via a duct from the outside that is connected to the connector on the underneath of the stove. The amount of air needed for combustion is 15 m³/h.

The connector for the combustion air has an external diameter of 67 mm. When duct routing further than 1 m the pipe diameter must be increased to 100 mm and a correspondingly larger wall vent must be selected.

In hot areas, the duct should be insulated with 30 mm mineral wool with a moisture inhibiting outer cover. It is also important to seal around the hole in the wall (or floor) of the lead-in using sealant.

A 1 m length of condensation insulated ducting for combustion air is available as an accessory. See page 33.

Installation distances

C556T

WHEN INSTALLING TURNTABLE (OPTION) the following installation distances do not apply. See the separate turntable installation instructions.

A separate glass hearth plate (accessory) increases the connection height to the chimney by 10 mm.

The minimum distance in front of the stove opening to combustible parts of the building or interior decoration must be at least 1 m.

The dimension diagrams only show the minimum permitted installation distances for the stove. When connecting to a steel flue, also note the safety distance requirements of the flue. The safety distance between an uninsulated flue and a combustible part of the building should be at least 450 mm.

INSTALLATION AGAINST COMBUSTIBLE WALLS

Permitted area for combustible parts of the building

INSTALLATION AGAINST FIREWALLS

* If the stove is placed on a hearth plate made of glass for example (accessory), the height from the floor is affected by a distance corresponding to the thickness of the hearth plate, for a free standing glass hearth plate this is 10 mm.

** To prevent discolouration of painted non-flammable walls we recommend that the same side distance as to combustible walls is used.

Declaration of performance according to Regulation (EU) 305/2011

No. C556T-CPR-191219

Contura

PRODUCT

Type Wood burning stove
Trade name Contura 556T
Intended area of use Heating of rooms in residential buildings
Fuel Wood

MANUFACTURER

Name NIBE AB / Contura
Address Box 134, Skulptörvägen 10

SE Montering

Om insatsen behöver läggas ned för att förflyttas bör lösa delar demonteras. Demontering av eldstadsbeklädnad beskrivs i slutet av denna anvisning.

- 1 Brasbegränsare
- 2 Rostertallrik
- 3 Varmluftsgaller
- 4 Eldstadsbeklädnad (Vermiculit)
- 5 Typskylt

DE Vor der Montage

Wenn der Einsatz in liegender Position versetzt werden muss, sind lose Komponenten zu demontieren. Die Demontage der Brennraumauskleidung wird am Ende dieser Anleitung beschrieben.

- 1 Stehrost
- 2 Rostteller
- 3 Warmluftgitter
- 4 Feuerstättenauskleidung (Vermiculit)
- 5 Typenschild

NO Før montering

Hvis innsatsen må legges ned for å flyttes, bør løse deler demonteres. Demontering av brennplater og hvelv er beskrevet mot slutten av denne veiledningen.

- 1 Kubbestopper
- 2 Rist
- 3 Varmluftsgitter
- 4 Brennplater og hvelv (Vermikulitt)
- 5 Typeskilt

FR Avant de procéder au montage

Les éléments non fixés devront être déposés si l'insert doit être couché pour être déplacé. Le démontage de l'habillage du foyer est décrite à la fin de ce document.

- 1 Grille de retenue
- 2 Grille
- 3 Grille air chaud
- 4 Habillage du foyer (Vermiculite)
- 5 Plaque signalétique

GB Prior to installation

If the insert needs to be put down to be moved, loose components should be removed. Removal of the hearth cladding is described at the end of these installation instructions.

- 1 Fire bars
- 2 Grate disc
- 3 Hot air grate
- 4 Fire bricks (Vermiculite)
- 5 Type plate

DK Før opstilling

Hvis indsatsen skal lægges ned for at blive flyttet, bør løse dele afmonteres. Afmontering af ovnbeklædning beskrives i slutningen af denne vejledning.

- 1 Brændeholder
- 2 Rund askerist
- 3 Varmluftsgitter
- 4 Ovnbeklædning (Vermiculite)
- 5 Typeskilt

FI Ennen asennusta

Jos tulipesä pitää siirtää kyljellään, irto-osat pitää irrottaa. Tulipesän verhoilun irrotus kuvataan ohjeen lopussa.

- 1 Suojareunus
- 2 Arina
- 3 Lämminilmaritilä
- 4 Tulipesän verho (vermikuliiitti)
- 5 Tyypikilpi

IT Prima del montaggio

Se è necessario smontare l'inserto per spostarlo, rimuovere prima i componenti liberi. La procedura di smontaggio del rivestimento del focolare è descritta alla fine delle presenti istruzioni.

- 1 Griglia ferma-legna
- 2 Griglia del braciere
- 3 Griglia di ventilazione
- 4 Rivestimento interno del focolare (vermiculite)
- 5 Targhetta identificativa

NL Voorafgaand aan montage

Als de inzet liggend moet worden verplaatst, moeten losse onderdelen worden gedemonteerd. De demontage van de haardbekleding wordt beschreven aan het eind van deze instructies.

- 1 Houtvanger
- 2 Roosterschijf
- 3 Heteluchtrooster
- 4 Haardbekleding (vermiculiet)
- 5 Typeplaatje

- SE Bakåtanslutning till murad skorsten
- DE Rückseitiger Anschluss an einen gemauerten Schornstein
- NO Bakmontering til murt skorstein
- FR Raccordement par l'arrière à une cheminée de maçonnerie

- IT Collegamento alla canna fumaria in muratura dal retro della stufa
- NL Achterwaartse aansluiting op een gemetselde schoorsteen

- SE** Toppanslutning till skorsten
Varmluftsgallret måste vara monterat innan skorstenen toppansluts.
- DE** Oberseitiger Anschluss an den Schornstein
Das Warmluftgitter muss montiert sein, bevor ein Schornsteinanschluss an der Oberseite erfolgt.
- NO** Toppmontering til skorstein
Varmluftsgitteret må være montert før skorsteinen topptilkobles.
- FR** Raccordement par le haut
Monter la grille d'air chaud avant le raccordement à la cheminée par le haut.
- GB** Top connection to the chimney
The hot air grille must be installed before chimney top connection.
- DK** Toptilslutning til skorsten
Varmluftristen skal være monteret, før skorstenen toptilsluttes.
- FI** Liitäntä ylöspäin savupiippuun
Lämminilmaritilä pitää asentaa ennen savupiipun liitäntää ylöspäin.
- IT** Collegamento alla canna fumaria dal piano della stufa
Prima di collegare la canna fumaria al piano della stufa, assicurarsi che la griglia dell'aria calda sia montata.
- NL** Bovenansluiting op een schoorsteen
Het heteluchtrooster moet zijn gemonteerd, voordat de schoorsteen op de bovenansluiting wordt aangesloten.

- SE** Använd bifogade shimsbrickor där det behövs för att få stenarna och sidoljusen att linjera.
- DE** Verwenden Sie die mitgelieferten Distanzscheiben je nach Bedarf, um die Steine und Seitenscheiben aneinander auszurichten.
- NO** Bruk om nødvendig de medfølgende distansestykkene (shimsskivene) til justering, slik at steinene og sideglassene kommer på linje.
- FR** Utilisez les cales fournies en cas de besoin pour aligner les pierres aux vitres latérales.
- GB** Where necessary, use the shims supplied to align the stones and the side lights.
- DK** Benyt de medfølgende afstandsskiver, hvor det er nødvendigt, for at rette sten og sidelys ind efter hinanden.
- FI** Käytä mukana toimitettuja säätölevyjä kivien ja sivulasien säätämiseen samaan linjaan.
- IT** Usare le rondelle di spessoramento in dotazione dove necessario per allineare le pietre e i vetri laterali.
- NL** Gebruik de meegeleverde shims waar dat nodig is om de stenen en zijruiten op één lijn te krijgen.

SE Uppställning av luckan, vid städning/service
Luckan kan spärras i öppet läge, med hjälp av låsarmen på kaminens vänstra sida.

DE Aufstellen der Tür für Reinigung und Service
Mithilfe des Armes an der linken Seite des Kamins kann die Tür in ihrer geöffneten Stellung arretiert werden.

NO Låsing av døren i åpen posisjon, ved rengjøring/service
Døren kan låses i åpen posisjon, ved hjelp av låsearmen på venstre siden av ovnen.

FR Placement de la porte, pour le nettoyage et/ou l'entretien
La porte peut être verrouillée en position ouverte, à l'aide du levier de verrouillage situé sur le côté gauche du poêle.

GB Door in open position, for cleaning/service
The door can be secured in the open position using the locking lever on the left side of the stove.

DK Spærring af lågen, ved rengøring/service
Lågen kan spærres i åben position ved hjælp af låsearmen på venstre side af brændeovnen.

FI Luukun asettaminen puhdistusta/huoltoon varten
Luukku voidaan lukita avattuun asentoon takan vasemmalla puolella olevalla lukitusvarrella.

IT Bloccaggio dello sportello per la pulizia/la manutenzione
Lo sportello può essere bloccato in posizione aperta con una levetta di blocco posta sotto la parte sinistra della stufa.

NL Plaatsen van de deur, bij schoonmaken/onderhoud
De deur kan in geopende stand worden vastgezet met behulp van de vergrendeling aan de linkerzijde van de kachel.
